Never pay full price for a replacement ball lift belt again!

Get our new Booster belt at regular price and get a **lifetime limited warranty.**

How it works: After the purchase of your original Booster belt, if it gets damaged and is in need of repair or simply wears due to high use, we can service that belt by refurbishing it on a pro-rated 10 year warranty basis as we've done for over two decades with our humpback customers. This saves you money and keeps you up and running headache free.

But it gets even better. Each belt has a serial number that is transferred and applied to the purchase of your next new belt when you trade it in. When that time comes, the serial number will allow you to purchase a new Booster belt at a wholesale price based on that year's current pricing of an ordinary AMF belt. For example, if the going price of an ordinary AMF belt is \$180.00, a new Booster belt with your trade in will be 90% of that price - only \$162.00 instead of the regular \$385 price of a new Booster belt and serial number.

How can we do this? It's very expensive to design, test, patent, tool up and market a totally new superior product. Our regular pricing allows us to manage our investment while future trade-ins will provide us with ongoing income while providing our customers with a superior product and substantial savings.

Warranty repair prices: (This promotion is good until the end of the 2025 calendar year)

Year 1 - \$70.00 Year 6 - \$120.00

Year 2 - \$80.00 Year 7 - \$130.00
